

The Power of Experience

By far the best way to learn is to immerse yourself and fully experience what it is you are learning. This LEAN BUSINESS SIMULATION is a learning experience specifically designed for modern day business leaders.

LEAN BUSINESS FOR MINING

... a unique learning experience for all functional leaders and line managers.

This is a ONE DAY IMMERSION WORKSHOP where participants role play within a production environment. Commencing with discussions around existing performance issues; participants go on to engage in the process, identify performance issues, develop solutions and gain a deeper understanding of value stream based business management.

The OVERALL INTENT of this simulation is for business leaders to experience practical modern day Lean Business Leadership.

The DESIRED OUTCOME is for participants to leave with a clear view of where and how they can implement improvement within their business.

1. The need for an integrated and holistic view of the core business

- Value Chain Analysis
- Theory of Constraints

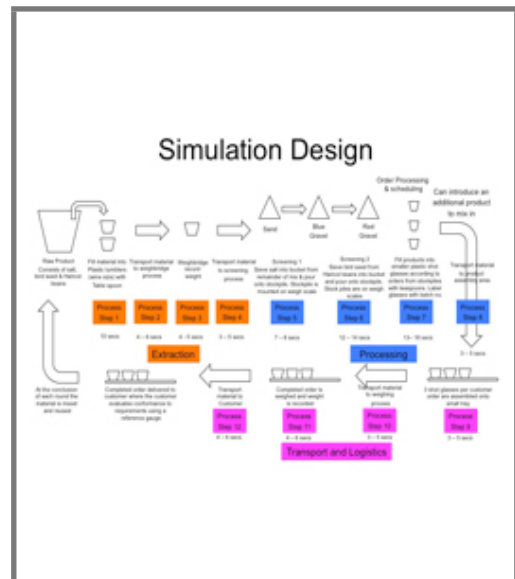

2. The importance of effective leadership and teaming skills in problem identification and sustainability of lean solutions

- Problem Identification Before Solution
- Coordinating Divergent Thinking - Engaging Diversity
- Emotional State and Meeting Needs

3. How processes are simplified – (power of LEAN concepts)

- Process Cycle Efficiency (PCE)
- The Tools of Lean

4. Understanding the impact of Variation on business performance

Specifically Tailored for Mining

This simulation is specifically designed to replicate the nature of the MINING ENVIRONMENT which is dynamic, complex and often unstable. To ensure a holistic view of the mining business is experienced, the simulation includes activities associated with Extraction, Processing, Transport and Logistics.

YOUR FACILITATOR

This simulation is facilitated by one of the most trusted and experienced business improvement experts in the world today; Harry Sinko.

Having worked with a diverse range of organisations, including mining companies such as BHP Billiton, Anglo American, Rio Tinto, Newcrest Mining, Peabody Energy, Xstrata and Western Mining Corporation, Harry brings very practical and relevant experience to this learning environment.

In addition to his extensive industry knowledge, his business improvement coaching and implementation experience in Australia, Brazil, Indonesia, South Africa and Mexico give him the foundations to generate powerful discussions about how to utilise the concepts anywhere in the world.

THE AGENDA

This simulation follows a clearly mapped out sequence of learning and application that concludes with discussion around the practical utilisation of what is learnt in an operational environment.

Part 1: Set Up / Understanding

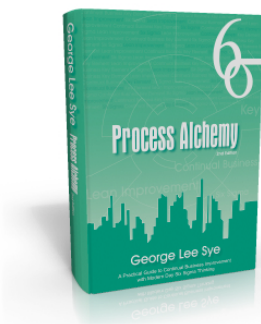

- Welcome and Introduction
- Identify Current Challenges
- Set Up the Simulation
- SIMULATION ROUND 1
- Traditional Solution Development
- Team and Interpersonal Issues

Part 2: Creating the Lean Business

- Value Stream Management
- Capacity Analysis
- Identifying Focus Areas
- The 7 Wastes
- Understanding the Tools of Lean
- Identify where tools can be utilised and applied within the business
- SIMULATION ROUND 2
- The Impact of Variation on Performance

RESOURCES

In addition to specific materials, certain organisational information must be obtained prior to the running of the simulation.

We recommend that all participants receive a copy of 'Process Alchemy with Lean Six Sigma - 2nd Edition'.
